

Assignment 6

Problem 1. *You decided to buy a cute rabbit. Unfortunately, it turns out you bought Bunnacula! On Halloween night, you accidentally left Bunnacula's cage unlocked and he escaped for a tasty treat. In your fridge, you have a carrot that is 5lbs (a pretty big carrot indeed). The carrot is 80% juice by weight. That night Bunnacula sucked some juice out of the carrot leaving the carrot 1% juice by weight. How much does the carrot weigh now?*

Problem 2. *Analyze the problem in a few sentences using the Pause and Reflect strategy by breaking the problem down to The Beginning, The Middle, and The End, as done in the lecture note posted online (i.e., answer a couple of the listed questions per each section).*
